ATHLETIC AND ACADEMIC PROGRAMS

Thanks to our team, national and international coaches, universities, and collaborators, we can offer academic and athletic scholarship programs for student-athletes with different backgrounds.

College education and sports are incredible growth on a personal level, and these years in college have a strong impact on the rest of our lives. We are passionate about guiding and helping students find the best college and achieve a positive, successful, and rewarding experience.

We are sharing this scholarship program with thousands of colleges dedicated to instilling and strengthening education and sports. Our recruitment services are designed for families who want to be a part of these sports and educational programs without headaches or surprises and for those who are looking to pay less at the end of the academic year.

OUR GOAL

Promote education and sports, optimizing the academic, athletic, and economic potential of each individual.

OUR VALUES

Integrity, compliance, honest communication, and willingness to help 24/7.

OUR GOAL

Help students and athletes get college scholarships. We want to empower leaders through education and sports.

OUR EXPERIENCE

2011

We started to collaborate with students and athletes.

944

Participants that we helped with university programs.

713

Educational centers and sports that we collaborate with.

11

foreign countries in which we have been hosting recruitment events.

OUR SERVICES

COLLEGE SCHOLARSHIPS SEARCH

We connect colleges and universities with future students and players.

Our team helps students obtain the best opportunities in sports and academic scholarships on the market. Our services are comprehensive and continuous throughout the whole process.

ENGLISH PLATFORM

We have an English online platform for our students where they can practice entrance exams for universities. They have access 24 hours a day and have TOEFL, SAT, and ACT exams.

TRYOUTS AND SHOWCASES

We offer preparatory and complementary programs to increase sports and educational opportunities. Athletes experience international tryouts and showcases that allow them to socialize and immerse themselves in new cultures while playing sports.

TOTAL GUIDANCE/TUTORING SERVICES

We connect colleges and universities with future students and athletes.

Our team helps students obtain the best opportunities in sports and academic scholarships on the market. Our services are personalized and continuous throughout the whole process.

TRANSFER MANAGEMENT

While many students find the right college and stay there for four years, statistics show that about one in three students who enroll in a four-year or two-year college are likely to transfer at some point. The reasons for transfer can be as varied as the students themselves. Whether you want to be closer to, or further from, home, change your major or program of interest, or want a more prestigious title, Our ScholarshipsUS advisors can help you through the transfer process. Since competition for open positions can be fierce and the university transfer process can be a huge hassle, our expert university advisors can guide you and get you the best opportunities to ensure a successful transfer.

THE UNIVERSITY

Choosing a university is one of the most important decisions in a person's life. For us, this is not a four-year decision; it is a decision for life! For this reason, we are here to guide and collaborate with students and their families on everything that scholarship management requires and provide external advice to make it the best and most appropriate option. We have the possibility of obtaining several types of scholarships; these opportunities can be partial or total. English programs usually last a year, and college degrees last 2 or 4 years, with 5 sports divisions.

WE ARE HERE TO HELP WITH EDUCATION

We know that the recruitment process and choosing the best university are complicated, frustrating, and overwhelming. The whole process of obtaining a sports scholarship takes a lot of dedication and work, both on and off the field. Therefore, we want to educate and help young athletes achieve their dream of playing for a university.

ScholarshipsUS has departments specialized in each section of the process: scouting, orientation, tutors, and admission.

THIS IS HOW WE DO IT

We provide personalized assistance in each stage of the process, and we also support families, students, athletes, collaborators, and the entire community through our website, email, phone, videos, social media, and seminars. *(on request).*

ASSESSMENT OF FUTURE STUDENTS AND ATHLETES

With us, specialists in university scholarships, it is possible to achieve sports and academic goals in an accessible way. University coaches trust us to be able to contribute to their teams, and we also have specialized advisors in each field who provide an honest assessment of the level of each athlete. This helps coaches, students, and their families set realistic goals for scholarships.

1) We identify the needs and goals of each student.
The first step is to be very clear about what we want to achieve.

2) We develop a short-term plan and a long-term strategy.
It is very important to stay focused throughout the entire process. If we know exactly where we are going, it is a lot easier to stay on the right track.

3) We do the research. In order to have a successful program, it is critical to be sure to cover every aspect of the sports process.

4) We choose the best option. The opportunities we offer are based on the needs of each student and their family in terms of economic, sporting, and academic aspects, priorities, and goals.

COLLABORATORS

ScholarshipsUS has built relationships with valuable global organizations in order to broaden its reach and improve its ability to provide first-class education, helping students, athletes, and families. The collaborators always play a fundamental role in discovering, motivating, promoting, and educating future students.
